Forecast for Friday 11 Feb 2022

Weather: After a cold night with a widespread frost, many ranges will be dry for most of the day. A few well scattered snow showers will develop across southern Lochaber and Argyll for a time in the morning. Widespread, persistent snow will spread east after dark, turning to rain along west coast ranges close to midnight.

Chance of cloud-free hill tops above 800m: 80% for daylight hours, best of the cloud free summits will be across Jura, Arran and the more southern Trossachs. Becoming 10% after dark.

Low Cloud and visibility: Good visibility expected for most of the day. Some patchy cloud down to 800 developing across southern Lochaber and Argyll for a while in the morning, mainly western facing slopes. Otherwise summits often clear of cloud during daylight hours. Cloud becoming widespread and lowering to 600 metres from the west after dark.

Met Office Aberdeen Meteorologist's View

Summit gales developing in the afternoon, and storm force winds across higher summits after dark. Combined with snowfall after dark this will make for some very hazardous conditions at height later in the day.

Forecast for Saturday 12 Feb 2022

Weather: Snow clearing away in the early hours, although snow confined to higher summits as freezing levels rise in the early hours. Then a windy day with frequent blustery showers, these falling as snow above 1000 metres at first, the snow level lowering to 800 metres by mid-afternoon. Temporary blizzard like conditions on the higher tops as snow showers pass by. Variable cloud cover, best chance of breaks will be in the northeast of the area.

Maximum wind: Strong southwesterly winds throughout the day, gusting 50 to 60 mph on the higher summits.

Chance of cloud-free hill tops above 800m: 50%, best chance in the northeast

Low Cloud and visibility: Poor in areas of low cloud down to 700 metres, this variable in extent. Best chance of breaks will be well inland, more so across the northern Trossachs.

Temperature: **Glens:** Plus 2 rising to 7 Celsius
At 800m: Plus 2 Celsius
Freezing level: 1300 metres falling to 1000 metres by late afternoon
